① EXXOX → OUTPUT will be error.

② SELECT * from employees where
SELECT e1.name from employees
SELECT e1.name from employees₁,
employees₂
Where e1.policy = e2.policy.

③ SELECT
*

From table_name
ORDER BY column_name ASC
LIMIT N;

The query to get the n^{th} highest record.

select * from (select * from table_name
ORDER BY column_name ASC LIMIT N)
AS tb1
ORDER BY column_name DESC
LIMIT 1;

④ SQL server drops all related obj, which exists inside a table like constraints, indexes, columns, defaults. yet dropping a table will not drop views & stored procedures as they exist outside the table.

It is TRUE

⑤ std-Info details.

std-Id	std-Department	std-course	std-c name
1	CSE	4	C
2	CSE	5	DBMS
3	ECF	4	CA
4	CSE	5	D.S
5	ECF	5	Micro P
6	CSE	4	DAA

Query:-

select * from std-Info details.

Where std-Id % 2 = 0;

⑥

To fetch odd numbered column.

(Alternate query)

select * from std-Info details

Where std-Id % 2 = 1;
